

BRIGHTHABITAT

DATA SHEET

Wi-Blue Gateway

This IoT Gateway provides Bluetooth Low Energy sensing and enables micro location triggered push notification messaging. It acts as a Wi-Fi hotspot and an iBeacon communicate with BLE enabled applications and devices. The XL option offers wireless mesh linking between Gateways. The web dashboard allows easy monitoring and management of each Gateway. VizLore also provides additional cloud services for added data extraction

FEATURES & BENEFITS

- Low cost enabler to enhance automated home and workplace processes
- Plug & play solution
- AllJoyn compliant
- Supports Project Haystack
- Enables off-site monitoring and control of BTLE enabled “things”
- Transforms legacy systems into multi-functional Internet of Things enabled processes

PRODUCT FUNCTIONALITIES

- iBeacon technology
- Provides real-time presence detection and proximity monitoring of BTLE enabled devices
- Gathers engagement metrics
- Wireless mesh feature to interconnect multiple Gateways
- Raspberry Pi 2 & 3 compatible

PRODUCT APPLICATIONS

- Off-site management of several locations from one web portal
- Build a network of beacons for advertising purposes
- Accurate, real-time space and asset management
- Customized IoT infrastructure for asset tracking, indoor positioning, energy saving and digital signage engagement metric tracking
